Hiring Manager
JPMorgan Chase & Co.

Subject: Application for Software Engineer Program

Dear Hiring Manager,

I am writing to express my keen interest in the Software Engineer Program at JPMorgan Chase. As a third-year B.Tech student specializing in Artificial Intelligence and Data Science at Sri Sairam Engineering College, I am eager to contribute my technical expertise and problem-solving skills to your esteemed organization.

My academic journey has equipped me with a strong foundation in programming, software development, and emerging technologies such as artificial intelligence and cloud computing. I have hands-on experience in Python, Java, and web development, and I have successfully worked on projects involving computer vision, real-time monitoring, and GAN models. Additionally, my internship experience has strengthened my ability to work in agile teams, develop scalable applications, and implement AI-driven solutions.

JPMorgan Chase's commitment to innovation and technological excellence resonates with my passion for building impactful software solutions. I am particularly drawn to the opportunity to collaborate with industry leaders, participate in initiatives like the Force for Good program, and enhance my skills through continuous learning and mentorship.

I am confident that my technical proficiency, adaptability, and problem-solving abilities align well with the program's objectives. I would welcome the opportunity to further discuss how my skills can contribute to your team. Thank you for your time and consideration.

Sincerely,
Nishanth J
